

## **Use and Handling Instructions for Microwave Safe Products**

Genpak [Smart Set Pro](#), microwave safe containers and lids are designed to withstand normal use in standard microwave ovens. Although it is impossible to foresee every application variable, below are several use and handling instructions we recommend you follow no matter what the application.

### **Safe Handling Instructions for Microwave Safe items**

- Safe maximum temperature is 210°F.
- Use no more than one container at a time in the microwave.
- Always loosen the lid prior to microwaving.
- Containers will become flexible when food is heated.
- Use caution when removing from microwave.
- Use hand protection to prevent accidental burning.
- Use caution when removing the loosened lid as steam could cause burns.
- Genpak Smart Set Pro containers and lids are top shelf dishwasher safe.

Genpak recommends all these steps be followed for safe and secure use. If you have any questions, please contact us directly at [info@genpak.com](mailto:info@genpak.com).
